

## ADANI GREEN ENERGY LIMITED

### Integrated Management System Policy

**Adani Green Energy Limited (AGEL)** is engaged in the business of developing, operating and maintaining the Utility Scale grid connected Renewable power plants. We are committed to reduction of **Carbon footprint** and contributing in Nation building by lighting up millions of households across the nation.

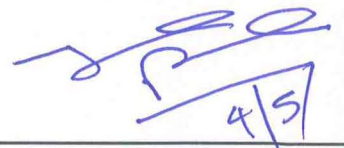

Our Green Energy Generation Projects are built on a robust foundation of International Standards, Best industrial practices, Commitment to honour and comply with applicable legal and other requirements. Our processes will consistently drive Engineering, Procurement, Construction, Commissioning, Operation and Maintenance activities in a manner to assure **continual improvement in** Quality, Environmental, Occupational Health and Safety, Energy and Asset Management.

We will realize our commitment towards our **Green** Energy pursuit through:

- **Generation** of Green Energy through adoption of Clean and environmentally sound technology which contributes towards environmental protection and prevention of pollution while enabling continuous strides in renewable sector.
- **Risk based** approach in identifying and mitigating OH&S and other risks thus preventing ill health, injury and other business contingencies.
- **Effective** processes for participation and consultation of employees in creating, nurturing and strengthening a safe and healthy workplace contributing for incremental business performance.
- **Efficient** Operations capable of conservation of energy and other natural resources in minimizing waste and enhancing our ability to deliver Sustainable outcomes.
- **Natural** instinct to be ahead of peers in embracing Innovation and advanced technologies resulting in improvement of asset and business performance.

Our above efforts would be strengthened by ensuring regular training, capacity building and information sharing with employees and engagement with stakeholders with earnest efforts in fulfilling their needs and expectations.
