## Independent Assurance Statement

To the management of:

Prayatna Developers Private Limited, Seventh Floor, Wing B, Sambhaav House, Judges Bungalow Road, Bodakdev, Ahmedabad – 380015;

Parampujya Solar Energy Private Limited, Seventh Floor, Wing B, Sambhaav House, Judges Bungalow Road, Bodakdev, Ahmedabad – 380015; and

Adani Green Energy (UP) Limited, Adani House, Nr. Mithakhali Six Roads, Navrangpura, Ahmedabad - 380009

### Introduction

We were engaged by Prayatna Developers Private Limited, Parampujya Solar Energy Private Limited and Adani Green Energy (UP) Limited ('Issuer') to provide "limited assurance" on conformance of their green bond issued on June 10, 2019 and the accompanying "Green Bond Information Report" with the Green Bond Principles, 2018 from International Capital Market Association (ICMA).

### Assurance Standards

We conducted our engagement in accordance with requirements of 'Limited Assurance' as per International Federation of Accountants' (IFAC) International Standard on Assurance Engagements [ISAE 3000 (Revised), Assurance Engagements Other than Audits or Reviews of Historical Financial Information].

### Assurance scope and level of assurance

Our scope of assurance included information on material aspects of the proposed green bond based on the requirements of the Green Bond Principles, 2018 as listed below:

- Use of Proceeds
- Process for Project Evaluation and Selection
- Management of Proceeds
- Reporting

### Specific limitations and exclusions

Our assurance process was subject to the following limitations as we have not been engaged to:

- Determine which, if any, recommendations should be implemented
- Provide assurance on information outside the defined reporting boundary and period
- Verify the Issuer's financial statements & economic performance
- Verify the Issuer's statements that describe expression of opinion, belief, aspiration, expectation, aim or future intention and national or global socio-economic and environmental aspects provided by the Issuer

## **Work undertaken**

We planned and performed our work to obtain all the evidence, information and explanations that we considered necessary to obtain a meaningful level of assurance in relation to the above scope. The procedures we performed, which are set out in detail below, were based on our professional judgment and included, as appropriate, inquiries, observation of processes performed, inspection of documents, analytical procedures, evaluating the appropriateness of quantification methods and reporting policies and agreement or reconciliation with underlying records. We believe that the procedures we have performed and the evidence we have obtained are sufficient and appropriate to provide a basis for our limited assurance conclusion.

To reach our conclusion we:

- Checked the Issuer's Green Bond Framework that includes processes, systems and controls in place for management of bond proceeds; investment areas for green bond proceeds and intended types of temporary investment instruments for the management of unallocated proceeds;
- Read sections of the bond disclosure documentation that also supports the objects of the green bond issue, investment areas for proceeds and intended types of temporary investment instruments for the management of unallocated proceeds;
- Conducted interviews with management and key staff of Issuer responsible for the green bond to obtain an understanding of the processes, systems and controls in place for management of bond proceeds;
- Checked the list of projects to which bond proceeds have been allocated and their conformance with the eligible green project categories specified in the Green Bond Principles, 2018;
- Confirmed the amount of bond proceeds allocated to nominated projects and assets through examination of Issuer's internal system for tracking use of proceeds and statement of accounts of the Issuer; and
- Recalculated carbon dioxide emission reductions from projects using invoices generated for sale of electricity from the nominated projects and assets on a sample basis.

## **Conclusions**

The following conclusion is based on the work performed and evidence obtained and the scope of our assurance engagement described above.

Nothing has come to our attention to suggest that the green bond issued on June 10, 2019 by the Issuer and the accompanying "Green Bond Information Report", is not, in all material respects, conforming to the requirements of the Green Bond Principles, 2018.

## **Independence**

The assurance was conducted by a multidisciplinary team including professionals with suitable skills and experience in auditing environmental, social and economic information in line with the requirements of ISAE 3000 standard. Our work was performed in compliance with the requirements of the IFAC Code of Ethics for Professional Accountants, which requires, among other requirements, that the members of the assurance team (practitioners) as well as the assurance firm (assurance provider) be independent of the assurance client, in relation to the scope of this assurance engagement. The Code also includes detailed requirements for practitioners regarding integrity, objectivity, professional competence and due care, confidentiality and professional behaviour. We have systems and processes in place to monitor compliance with the Code and to prevent conflicts regarding independence. We apply ISQC 1 and comply with the applicable independence and other ethical requirements of the IESBA code.

### **Management's responsibility**

The Management of the Issuer is responsible for ensuring that the Issuer and their green bond complies with the requirements of the Green Bond Principles, 2018. This responsibility includes designing, implementing and maintaining systems and processes relevant for the management of green bond proceeds.

The Management of the Issuer is also responsible for preventing and detecting fraud and for identifying and ensuring that Issuer complies with laws and regulations applicable to its activities.

### **Our responsibility**

Our responsibility is to report in the form of an independent limited assurance conclusion in relation to the above scope based on the procedures performed and the evidence obtained. We conducted our engagement with a multidisciplinary team which included professionals with suitable skills and experience in auditing environmental, social and economic information in line with the requirements of ISAE 3000 standard.

This assurance report is made solely to Issuer in accordance with the terms of our engagement, which include agreed arrangements for disclosure. Our work has been undertaken so that we might state to Issuer those matters we have been engaged to state in this assurance report and for no other purpose. Our assurance report should not be regarded as suitable to be used or relied on by any party wishing to acquire rights against us other than Issuer for any purpose or in any context. Any party other than Issuer who obtains access to our assurance report or a copy thereof and chooses to rely on our assurance report (or any part thereof) will do so at its own risk. To the fullest extent permitted by law, we accept or assume no responsibility and deny any liability to any party other than Issuer for our work, for this independent limited assurance report, or for the conclusions we have reached.
