India: Energy Storage Needed for Integration of RE Capacities in the Grid

Policy level interventions has enabled integration of solar thereby shifting the evening peak to day time

- Separation of Agriculture feeders shifting them to balance demand
- Promotion and Subsidisation of solar pumps
- Energy efficiency through various initiatives such as smart meters

India can solve the supply-demand mismatch by:

- Power demand management - shifting power load to daytime
- Flexing thermal and hydro
- **Storage – Hydro PSP and Batteries**

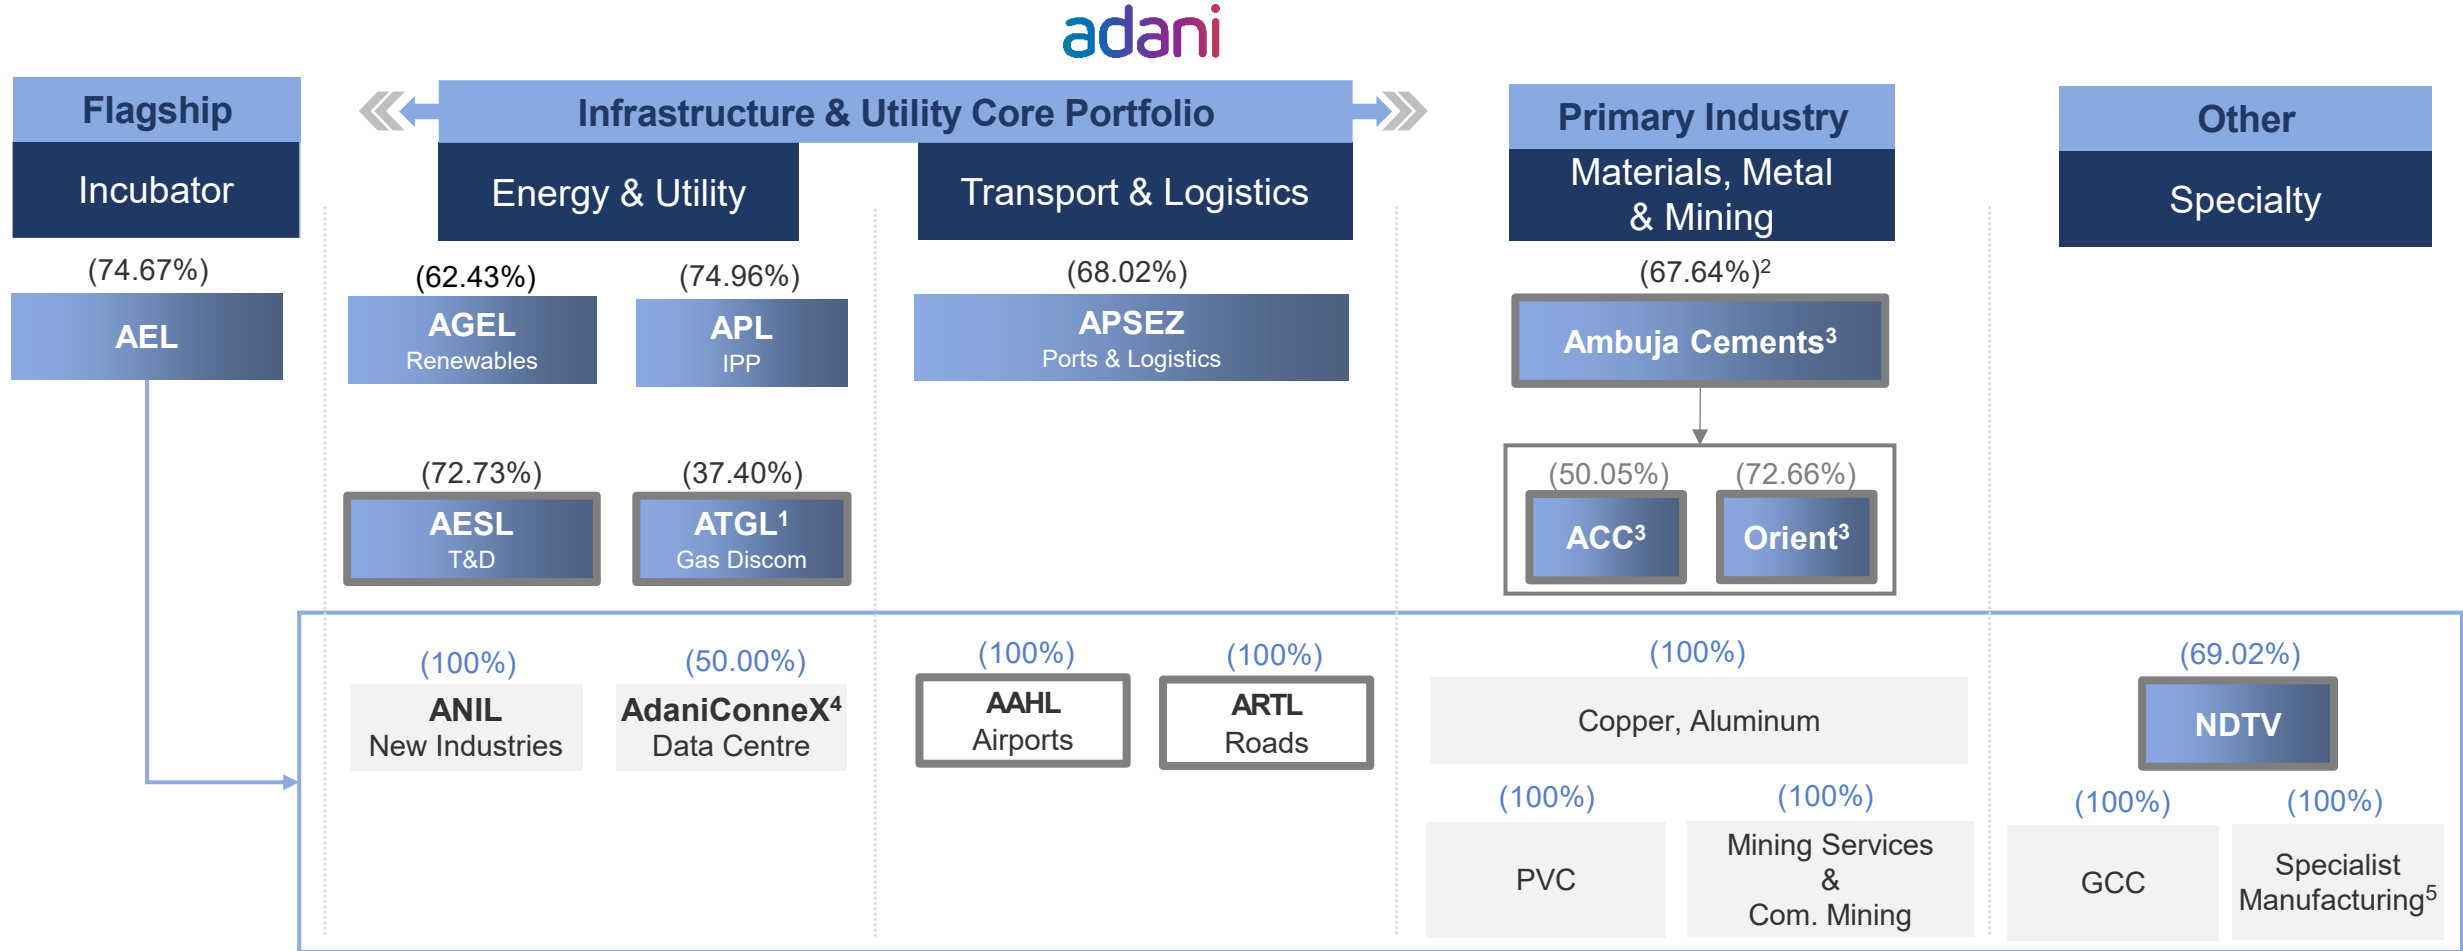

As per CEA, the peak demand by FY32 expected ~388 GW.

The energy storage systems are planned to be integrated in the grid with following capacity by FY32–

- **47 GW - Battery Energy Storage System (BESS)**
- **36 GW - Pumped storage project (PSP)**

Significant unmet demand during non-solar hours creates a strong case for Energy Storage
